Skills / Core technologies

- **Programming:** Kotlin, Java, Python, C++, C, TypeScript, Bash, PowerShell
- **Backend Engineering:** REST APIs, API integrations, WebSocket, FIX, backend development, JVM ecosystem
- **Cloud & Infrastructure:** AWS, Azure, GCP, AWS IAM, AWS EKS, cloud platforms
- **Containers & Orchestration:** Docker, Kubernetes, Helm
- **Infrastructure as Code:** Terraform, Ansible, IaC
- **CI/CD & Release Engineering:** GitLab CI/CD, Jenkins, deployment automation, release engineering
- **Observability & Reliability:** Grafana, Prometheus, Elasticsearch, monitoring, alerting, logging, troubleshooting, operational support
- **Data & Tools:** SQL, MongoDB, Git, GitHub, Jira, Confluence, VMware, Linux, Windows

Jakub Lichosik

Software Engineer - DevOps - SRE

Software Engineer / DevOps / SRE with 6+ years of experience in banking, fintech, embedded systems, and automation. Hands-on experience with Python, Kotlin, Java, C++, AWS, Kubernetes, Docker, Terraform, GitLab CI/CD, Grafana, and Prometheus. Delivered backend features, CI/CD pipelines, cloud automation, monitoring solutions, and process improvements in regulated environments. Additional experience as Scrum Master / Product-oriented technical contributor.

Work experience:

Freelance Web Developer & Technical Consultant June 2024 - June 2026 **Füllinsdorf, Switzerland**

- Worked independently on web development projects and confidential consulting engagements under NDA
- Designed and delivered websites for small businesses and private clients.
- Full-time German course 6 months ECAP Basel (from A1 to B1).
- Selected projects and code samples: github.com/Kuber-code

Software Developer & Scrum Master March 2022 - April 2024 **SIX Digital Exchange - Zurich, Switzerland**

Software Developer:

- Polyglot programming (Kotlin, Python, Java, Clojure (+ REST APIs), TypeScript). Bugs fixing. New features (backend, frontend, Corda blockchain). JVM in a regulated banking environment.

Scrum Master, Process Optimisation:

- Converter App for Testers and BAs. Three Amigos Sessions. Onboarded 10+ new joiners. Created 30+ Confluence know-how documentation. Conducting Scrum events. Managing Atlassian Jira stories and epics. Collaboration with stakeholders.
- References available upon request: [Link](#)

Quantitative Developer / DevOps / SRE / Release Engineer July 2021 - February 2022 **Portofino - Zug, Switzerland**

Quant Dev:

- C++ programming and testing - creating scalable and optimal code for Crypto Markets: authentication, communication by REST API, WebSocket and FIX, unit tests in Google Test (gmock).

SRE, Release Eng:

- Application deployment and updates (GitLab CI, Docker, Kubernetes, HELM, Terraform, AWS IAM). Python, Powershell scripting.

Own Projects (self planned, created and maintained):

- Packet Capturing (AWS EKS, Traffic Mirroring, Tcpdump, Wireshark). Alerting - Monitoring System (Grafana, Prometheus, MongoDB, notifications). Morning Routine (Python and Bash scripting in AWS Linux).

- **Testing & Quality:** Unit testing, Google Test, gmock, debugging, bug fixing
- **Methods:** Agile, Scrum, Kanban, stakeholder collaboration, process improvement

Hobbies:

climbing, snowboard & ski, gym, books, investments, chess & gaming, guitar, music production Ableton 12

Software Developer

VASCO/OneSpan - Katowice, Poland

February 2021 -
June 2021

- **Software Developer:** C++ programming, authentication (Active Directory) on Windows. Bugs fixing on virtual systems (VMWare).
- **DevOps:** Pipelines handling (Jenkins). Identity integrations (Okta).

Development Engineer

DisplayLink (later Synaptics) - Katowice, Poland

January 2020 -
September 2020

- **Engineer:** C++ programming Software and Hardware Embedded Debugging. Universal Docking Station (Dell, HP etc.).
- **Scrum Master:** Managing ticketing system (Jira Atlassian).

Robotics Engineer

RW Swiss Automation - Katowice, Poland

October 2017 -
December 2019

- **Industrial Robots:** simulation (Kuka, ABB, Fanuc) in Process Simulate and RobCad.
- **PLC Controllers:** programming and simulation.

Education:

Master Engineer of Computer Science

Silesian University of Technology - Gliwice, Poland

October 2016 -
November 2018

Master's Thesis: "Clustering of electricity consumers" (MATLAB).

Bachelor Engineer of Automatic Control and Robotics

Silesian University of Technology - Gliwice, Poland

October 2011 -
January 2016

Engineering Project: "Temperature control system on Siemens Simatic S7".

Projects/Academic activity:

Board of European Students of Technology Gliwice

January 2013 -
November 2018

- **Job Fairs BIT Festival 2014/2015 - Fundraising the Project** - acquiring 12 companies for job fairs, contact with the university authorities, coordinating the working group of 20 people
